Ranking Member  
House Appropriations Committee  
Washington, DC 20515

The Honorable Richard Shelby  
Chair  
Senate Appropriations Committee  
Washington, DC 20510

The Honorable Patrick Leahy  
Vice Chair  
Senate Appropriations Committee  
Washington, DC 20510

Dear Chair Lowey, Ranking Member Granger, Chair Shelby and Vice Chair Leahy:

The undersigned members of the Friends of HRSA coalition recommend providing a minimum of \$7.32 billion for discretionary Health Resources and Services Administration programs in any final FY 2020 Labor, Health and Human Services, Education, and Related Agencies appropriations bill, the level approved in the House-passed version of the bill. HRSA is an essential component of the nation's health care system, yet the agency's discretionary budget authority remains far below the funding level needed to effectively address the nation's health care needs. Additional funding will allow HRSA to fill preventive and primary health care gaps and to build upon the achievements of HRSA's more than 90 programs and more than 3,000 grantees.

Friends of HRSA is a nonpartisan coalition of nearly 170 national organizations representing public health and health care professionals, academicians, and consumers invested in HRSA's mission to improve health and achieve health equity. The coalition advocates for strengthening funding levels for HRSA's discretionary budget authority to enable the agency to keep pace with the persistent and changing health demands of the nation's growing, aging and diversifying population and constantly evolving health care system.

HRSA is a national leader in improving the health of Americans by addressing the supply, distribution and diversity of health professionals, supporting training in contemporary practices and providing quality health services to the nation's most vulnerable and underserved populations. This includes people living with HIV/AIDS, pregnant women, mothers and their families, and those otherwise unable to access high quality health care. HRSA also oversees organ, bone marrow and cord blood donation, compensates individuals harmed by vaccination and maintains databases that protect against health care malpractice, waste, fraud and abuse.

While we recognize the difficulty you face in a constrained budget environment, the passage of the Bipartisan Budget Act of 2019 provides Congress with the ability to increase investments in programs that keep people healthy. HRSA programs have a strong track record of successfully improving the health of people at highest risk for poor health outcomes. The agency supports efforts that increase access to quality care, better leverage existing investments and achieve improved health outcomes at a lower cost.

In addition to discretionary funding, mandatory funding for community health centers, the National Health Service Corps, Teaching Health Centers Program, and Family-to-Family Health Information Centers account for more than 40% of HRSA's total program level. While these programs narrowly avoided the September 30 expiration of mandatory funding, the two-month funding extension passed by Congress, and signed by the president, merely provides temporary relief. We urge you and your colleagues to ensure lasting funding for these vital programs. In the absence of continued mandatory funding for these programs, it will be exceedingly difficult to address these shortfalls in the Labor-HHS-Education appropriations bill.

The nation faces a shortage of health professionals, and a growing and aging population which will demand more health care. HRSA is well positioned to address these issues and to continue building on the agency's many successes, but a stronger commitment of resources is necessary to effectively do so. We urge you to consider HRSA's central role in strengthening the nation's health and to support a minimum funding level of at least \$7.32 billion for HRSA's discretionary budget authority in FY 2020.
