

Prevent Blindness  
Adult Vision Screening

**Exit Interview Procedure and Script**

Check the Registration Form for completeness and legibility.

On the bottom of the Registration Form, under Exit Interview, check the recommendation to see an eye doctor if:

**1. Based on Risk Assessment**

If a subject answers “yes” to two or more of the questions on the risk assessment or “yes” to any bold questions, the subject fails the risk assessment and should be referred. (Recommendations can be found on the yellow and pink sheets on the registration form)

**Question**

- Do you have blood relatives with glaucoma?
- Has a doctor treated you for or said you have glaucoma?
- Have you ever had an eye injury or eye surgery?
- Have you noticed a change in vision in the last 12 months?**
- Do you have persistent pain in or around your eye?**
- Are you black, Hispanic or Latino, and age 40 or older?
- Are you age 60 or older?
- Was your last dilated exam more than two years ago?
- Do you have diabetes?
- If yes, was your last dilated eye exam more than one year ago?**

**Recommendation**

- See doctor regularly
- See doctor regularly
- See doctor regularly
- See doctor soon**
- See doctor now**
- See doctor regularly
- See doctor annually
- See doctor regularly
- See doctor annually
- See doctor soon**

**2. Distance visual acuity is 20/50 or worse in either eye**

**3. Near visual acuity is 20/50 or worse in either eye**

*Discuss the results with the subject and point out “ Prevent Blindness Recommendations: What they Mean” on the back of the pink sheet*

*See referral script below for appropriate information to provide to each referred individual. Give the subject the last (pink) copy of the form.*

*If the person passed the screening, tell them that they passed the screening, but please understand that a screening is not a comprehensive eye examination and that a screening does not test for eye disorders. If you suspect you are having a vision problem, you should arrange to see your eye care professionals as soon as possible, regardless of today’s screening.*

***If the Person is Referred:***

*Explain the reason for referral using your best judgment when explaining the urgency of seeing an eye doctor.*

*Provide educational materials and/brochures as needed. If the person is referred, offer assistance in finding eye care if needed. Materials include:*

*-The last page of the Risk Assessment (pink copy)*

*-Prevent Blindness Vision Care Financial Assistance Resource List ([https://preventblindness.org/wp-content/uploads/2022/01/IC03\\_Financial\\_Assistance13122.pdf](https://preventblindness.org/wp-content/uploads/2022/01/IC03_Financial_Assistance13122.pdf))*

*-Fact Sheet- Finding and Eye Care Professional ([https://preventblindness.org/wp-content/uploads/2011/06/MK62\\_FindingEyeCarePro.pdf](https://preventblindness.org/wp-content/uploads/2011/06/MK62_FindingEyeCarePro.pdf))*

*-Medicare and /or Medicaid information (<https://preventblindness.org/wp-content/uploads/2022/02/MK66-MedicareEyesF-3-1.pdf>)*

*-If appropriate, your contact information to assist with follow-up*

*-Follow-up letter/results report*

***Referral for Risk Assessment Script***

See an eye doctor **NOW** is indicated if the person has persistent and significant pain in and around the eyes.

*Persistent pain in and around the eyes can indicate a serious problem. Only an eye doctor can diagnose vision problems and treat eye diseases to prevent vision loss. Please don't wait to get an eye exam. May we assist you in making an appointment?*

See an eye doctor **SOON:**

*Because you said that you had a change in your vision in the last 12 months and haven't seen any eye doctor...or*

*Because you have diabetes and have not had an eye exam in over a year, we recommend that you make an appointment to see an eye doctor in the near future for a comprehensive eye exam. Please know that this screening does not replace an eye exam.*

See an eye doctor **Annually:**

*Based upon your risk factors, we recommend that you see your eye doctor once each year for a professional eye exam. Please remember that a screening does not replace an eye exam.*

See an eye doctor **REGULARLY:**

*Prevent Blindness recommends that people age 40 or older, without symptoms or special risk factors, see their eye doctor at least every two years. People who are diabetic or who are at risk for glaucoma should see their eye doctor once a year or more depending on their eye doctor's recommendations. Please remember that a screening does not replace an eye exam.*

## **Referral for Distance and/or Near Visual Acuity Script**

*The result of the screening indicate that you are not seeing as well as you should. It may be time for glasses or a new prescription. We recommend you see an eye doctor in the near future for a comprehensive eye exam.*
