Medicare – Glaucoma Benefits

Medicare beneficiaries, family members, and caregivers can visit [Medicare.gov](http://www.Medicare.gov), the Official U.S. Government Site for People with Medicare, for the latest information on Medicare enrollment, benefits, and other helpful tools.

Medicare Part B (Medical Insurance)

Medicare Part B (Medical Insurance) covers glaucoma tests once every 12 months if you meet the high-risk criteria for glaucoma.

You are considered at high-risk for glaucoma if one or more of these applies to you:

- You have diabetes
- You have a family history of glaucoma
- You are African American and age 50 or older
- You are Hispanic and age 65 or older

You are responsible 20% of Medicare's payment to the provider for the services or, if care is sought in a hospital outpatient setting, a standard copayment. The Part B deductible applies to these services. If your doctor recommends you receive services more often than is allowable under Medicare or recommends services that are not provided under Medicare, you may need to pay all costs. Be sure to ask your provider about these costs before you receive treatment.

The tests to screen for glaucoma include:

1. Dilated eye examination
2. Intraocular pressure measurement
3. Direct ophthalmoscopic examination, or a slit-lamp biomicroscopic examination

For more information, visit: www.medicare.gov/coverage/glaucoma-tests

Prescription Drug Benefits (Medicare Part D)

All Medicare beneficiaries should know that help is available for the costs of prescription drugs, including those taken for their eyes. It is important to follow your eye doctor's instructions for how often to take eye medications. Missed dosages can lead to increased risk of vision loss.

Medicare prescription drug coverage is an optional benefit offered to everyone who has Medicare. This includes eye medications. You must enroll to access this benefit. Note, there are penalties for people who miss enrollment deadlines.

Medicare plans will vary depending on where you live, and each plan is different. This can be confusing, but there are resources which can help you to understand your choices.

MEDICARE: Extra Help with Medicare Prescription Drug Plan Costs

www.ssa.gov/benefits/medicare/prescriptionhelp. Medicare beneficiaries can qualify for Extra Help with their Medicare prescription drug plan costs. The Extra Help is estimated to be worth about \$5,000 per year. To qualify for the Extra Help, a person must be receiving Medicare, have limited resources and income, and reside in one of the 50 States or the District of Columbia. For further assistance with the program, visit the PAN Foundation website: www.panfoundation.org/extrahelp.
